## Additional information

I am deeply passionate about programming; I truly enjoy it and am continuously growing in this field. I have a solid understanding of key concepts, including Object-Oriented Programming (OOP) and Functional Programming. I am familiar with how client-server interaction works, and I have a good grasp of both frontend and backend development. Overall, I have a strong desire to grow and develop further in this direction.

Currently i'm working on my own project: web-shop
